

Concrete Defense®

ITEM	DESCRIPTION	PACK
------	-------------	------

The Hillyard Concrete Defense® line of products is suited for light duty and medium duty applications. In addition to Cover 1® and Cover 2® coating systems, Concrete Defense® includes Cutback®, a safe acid etching product used in the preparation of bare concrete for coating, and Repel® provides a durable, subsurface, transparent protective barrier against water and oil making concrete and other porous stone surfaces easier to clean and maintain. When it comes to concrete, Hillyard has it covered!

Coating concrete surfaces helps control dusting making floor easier to maintain, improves appearance, and can enhance lighting levels.

A. COVER 1®

Light duty concrete seal for pedestrian traffic. A single component, 25% solids, waterborne acrylic formulation with excellent water resistance, enhanced chemical resistance, and high initial gloss. Ideal for use on concrete floors under pallets and racking systems. May be applied to bare or previously coated concrete floors.

B. COVER 2®

Two-part, medium duty, concrete seal that makes it ideal for fork truck traffic and most warehouse conditions. A two-component, 25% solids, waterborne acrylic formulation with excellent water resistance, enhanced chemical resistance, and high initial gloss. A pre-measured second component is added at time of application providing enhanced durability.

C. REPEL®

Penetrating water-based sealer for concrete and porous stone surfaces. Non-silicone formula provides a durable, subsurface, transparent protective barrier against water and oil. May be used in-doors and outdoors on driveways, patios, loading docks and more. Helps reduce chipping and cracking from freeze/thaw cycles.

HIL0049706	1 gal.	4
HIL0049733	2.5 gal.	1
HIL0049709	55 gal.	1

D. CUTBACK®

A dilutable concrete etcher and cleaner formulated to prepare bare, open concrete for coating with water-based concrete seals like Hillyard Cover 1™ and Cover 2™. Formulated with Phosphoric acid making it easier to use and without the negative effects of Hydrochloric acid.
