Why green?

The simple answer: Green is better for the health and well-being of people, and better for the environment we live, learn, and work in.

Why now?

Recent advancements in the cleaning industry have led to products that perform as well or better than their traditional counterparts. These advancements have led to pricing for green products that is competitive with traditional products.

How does green lower cost?

When green products are combined with best practice, high performance cleaning processes, a facility manager can lower the total cost to clean a facility. Not bad, considering it is better for people and the environment, too. Additionally, improved health and well-being can lead to lower absenteeism rates, and increased productivity.

Improving Indoor environments.

Using green products in high performance cleaning does more than improve facility appearance. For example, green cleaning products are formulated with less volatile organic compounds (voc's) than traditional products. Lower voc's lessens the negative impact on the air we breathe, contributing to a healthier indoor environment.

Who Is Green Seal?

Green Seal is an independent, non-profit organization that strives to achieve a healthier and cleaner environment. Green Seal has no financial interest in the products that it certifies or recommends nor in any manufacturer or company. Green Seal's evaluations are based on state-of-the-art science and information using internationally recognized methods and procedures. Green Seal provides credible, objective and unbiased information whose only purpose is to direct the purchaser to environmentally responsible products and services.
