

Multi-Flo^{XP}

Versatility

Use On Many Surfaces

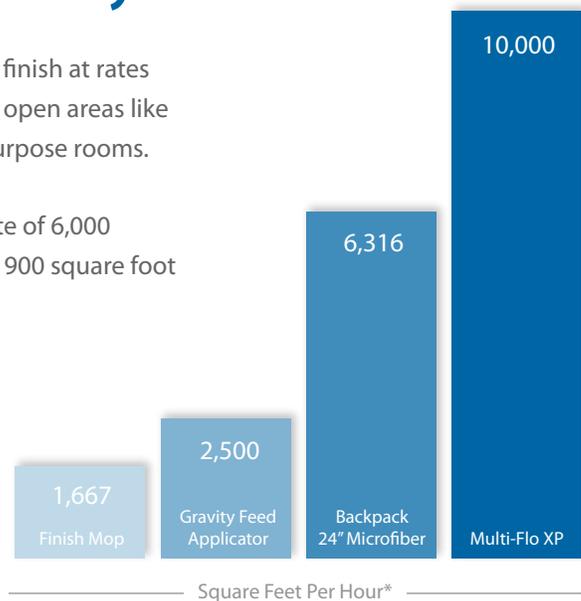

- Resilient/Vinyl
- Wood
- Terrazzo
- Smooth Concrete

Improve Productivity

The Multi-Flo® XP is fast! Apply floor finish at rates up to 10,000 square feet per hour in open areas like hallways, gymnasiums, and multi-purpose rooms.

Apply finish in smaller rooms at a rate of 6,000 square feet per hour. That's a typical 900 square foot classroom in less than 10 minutes.

**ISSA 540 Cleaning Times used for comparative systems.*

Better Results, Minimal Training

It's in the design. Being in the floor coatings business for over 100 years has its advantages. Our coatings experience has led to a design that consistently delivers better results with minimal operator training. Multi-Flo XP takes about the same amount of skill to operate as a push lawn mower.

Maneuverability

Four independent swivel castors allow for maximum maneuverability. It's easy for an operator to get the Multi-Flo XP into tight corners, around pillars, or moving in a straight line.

The articulating handle gives the operator complete control and the freedom to perfectly position the Multi-Flo XP in the tightest spots.

Consistency

Independently weighted application heads provide a consistent level pressure to the applicator to achieve specified coverage rates. The result is uniform coats of finish that make your floor look great - regardless of who is laying the finish. Traditional methods rely on the operators "touch and experience." The weight of gravity feed systems constantly changes as product is being applied, making it nearly impossible to achieve consistent, uniform coats.

Battery Operated Pump System

The battery operated pump system quickly dispenses finish. At the touch of a button, saturate the application head and keep a consistent "well" of finish to maintain a wet edge - a key to avoiding streaks and achieving better results.

Easy to access, yet protected, charger port. Simply plug in your charger to recharge your battery operated system.

Battery Life

Coat about 100,000 square feet on a full charge!

Multiple Container Options

Bag-in-box, 5 gallon buckets, 2.5 and 1 gallon containers, the Multi-Flo XP accommodates them all! One applicator. Multiple containers. Many surfaces. Multi-Flo XP just makes sense.

Select from any Hillyard high-performance finish or sealer and it will work with the Multi-Flo XP.

Water-Based and Solvent-Based Finish

Multi-Flo XP is designed to use both water-based and solvent-based finish. Solvent requires a different pump. See the configuration table on back for ordering.

Better Ergonomics & Safety

It's just not natural body movement to push and pull a heavily saturated finish mop across the floor. The upper body is constantly moving, stretching, and reaching when applying finish with mops, backpack systems or gravity feed applicators.

When applying finish with a Multi-Flo XP, the operator uses a more natural upright walking position. All the finish weight is distributed over four large casters making it easier to position the applicator.

Folding Handle

Handle folds making it easy to transport and store.

Complete System Configuration Options

The Multi-Flo® XP has been designed with application specific components to maximize results. The three configurations available are for floor finish (resilient/vinyl tile), water-based gym finish, and solvent-based gym finish.

Base Unit Pictured Without Application Head Assembly

Configuration	Applicator Head	Applicator Pad Refills	Pump System
HIL50110 Floor Finish System Complete <i>Base unit, battery, charger, weights, clean out tube, B-I-B hookup. Plus, applicator head, one pad, and pump listed at right.</i>	 Flat Pad Assembly	 HIL55330	HIL50226 .5 GPM 12V 
HIL50109 Water-based Gym Finish System Complete <i>Base unit, battery, charger, weights, clean out tube, pail/2.5 gal. dip tube B-I-B hookup. Plus, applicator head, one pad set, and pump listed at right.</i>	 Single Bar System	 HIL50113 Applicator Pad, 1 - 30"	HIL50200 3 GPM 12V 
HIL50108 Solvent-Based Gym Finish System <i>Base unit, battery, charger, weights, clean out tube, pail/2.5 gal. dip tube. Plus, applicator head, one pad set, and pump listed at right.</i>	 Double Bar System	 HIL50162 Applicator Pad Set, 1-23", 1-30"	HIL50127 1.9 GPM 12V Rated for solvent use.* 

Conversion Kit Options

Once you have a complete Multi-Flo XP, convert it from one application to another with one of the following kits.

Conversion Kit	Applicator Head Assembly	Applicator Pad Refills	Pump System
HIL50262 Floor Finish System Conversion Kit <i>Applicator head, one pad, and pump listed at right. Plus, all hardware to make conversion.</i>	 Flat Pad Assembly	 HIL55330	HIL50226 .5 GPM 12V 
HIL50261 Water-based Gym Finish Conversion Kit <i>Applicator head, one pad set, and pump listed at right. Plus, all hardware to make conversion.</i>	 Single Bar System	 HIL50113 Applicator Pad, 1 - 30"	HIL50200 3 GPM 12V 
HIL50260 Solvent-Based Gym Finish Conversion Kit <i>Applicator head, one pad set, and pump listed at right. Plus, all hardware to make conversion.</i>	 Double Bar System	 HIL50162 Applicator Pad Set, 1-23", 1-30"	HIL50127 1.9 GPM 12V Rated for solvent use.* 

All information herein is subject to change without notice.

* HIL50127 pump is rated for solvent use and can also be used for NON BAG-IN-BOX water-based finishes.

Simple Clean Up

Unlike mops and buckets, backpack systems, and gravity feed applicators, Multi-Flo XP is easy to clean.

- Finish is used right out of its own container. No buckets, reservoirs, or special backpacks to fill, clean, or pour left-over finish from. Left-over finish with the Multi-Flo XP? Just put the cap back on it.
- A very short run of large diameter tubing is easily flushed clean. For water-based finishes, a small amount of water is circulated through the pump. Solvent-based finishes require a solvent rinse.
