

An Inexpensive Insurance Policy

By Darin Miller, GM Indiana

Description

Nutra-Rinse® has been in our line for many years, and continues to fill a very important role in our offering. It is a great utility product and is very effective for neutralizing alkalinity on many surfaces.

Situation

How many times have you seen this happen with stripping/refinishing?

1. Customer lays the final finish coat
2. Customer encounters adhesion and appearance issues
3. Customer becomes dissatisfied and frustrated!

Insurance Policy

As we all know, labor is the largest cost associated with stripping a floor, so a great deal of time and money can be lost due to an improperly rinsed floor. At just four ounces per gallon of water, Nutra-Rinse serves as a cost-effective “insurance policy” against the unseen residual alkalinity that can happen when everything seems to have been done correctly.

Adding Nutra-Rinse to the rinsing process provides an “insurance policy” to a properly neutralized floor, exceptional results, and a satisfied customer!

Did you know?

- Can remove the white film from hard floors left by ice melt residue: Mop or run through an auto-scrubber.
- Can remove ice melt residue from carpet: Run it through an extractor and quickly eliminate the problem.
- Can aid in removal of soap build-up in carpet: A very common problem as many customers will have literally years of chemical build-up in their carpets. You can pre-spray with Nutra-Rinse or run it through an extractor.
- Carpet rinse: Use as a rinse additive in a normal carpet extraction program.
- pH range of 6.0-7.0.
- HMIS rating of 0, 0, 0: Very safe!
- Health rating of 1/0: Very safe!
