

CCAP QC - Quality Control

Making it easier to manage, monitor, and take corrective action is critical to delivering clean, healthy buildings within plan. It's called ongoing quality control and it's what CCAP QC is all about.

Backed with over 100 years of cleaning experience, we have developed a quality control program that is simple, intuitive and flexible to use. A program that is so simple to use that it will be easy to sustain an ongoing quality control program that continuously improves outcomes and cleaning results.

With CCAP QC, you have the ability to quickly:

- Perform Pass/Fail Inspections Based On Work Zones
- Create Randomized Inspections
- Measure Performance By Area, Zone, or Employee
- Attach Pictures Taken With A Smart Phone To An Inspection Report
- Communicate and Implement Corrective Action

Use the web-based, internet connected CCAP QC module to quickly perform "tap and click" walk through inspections. Or, use the software to print offline forms for inspections.

Easily generate reports by building, areas, rooms, zones or staff member. Use the reports to reward performance, pinpoint deficiencies and outline corrective actions.

Implement Automated Quality Control

- Keep The Program On Target
- Manage Performance
- Pinpoint Deficiencies
- Increase Accountability
- Improve Results
