Clean and disinfect hard, nonporous surfaces. Can be used in schools, health clubs, grocery stores, or anywhere surface disinfection is needed. Effective against multiple organisms including: E. coli, MRSA, HIV-1 and Norwalk virus. Simply pull wipe from container and dispose of in trash after use. Active Ingredients: Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 0.105%, Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides 0.105%. Inert Ingredients: 99.790%.

Features & Benefits

• Cleans and disinfects hard, non-porous surfaces.
• Use anywhere surface disinfection is needed.
• EPA registered disinfectant.

Efficacy

An effective disinfectant against:

Escherichia coli (E. coli)
Escherichia coli O157:H7
Pseudomonas aeruginosa
Salmonella choleraesuis
Vancomycin Resistant Enterococcus (VRE)
Mycobacterium bovis BCG (Tuberculosis)
Staphylococcus aureus
Staphylococcus aureus (MRSA)
Vancomycin Intermediate Resistant Staphylococcus aureus (VISA)

Virucidal against:

Human Immunodeficiency Virus Type 1 (HIV-1)
Norovirus (Norwalk Virus)
Feline calicivirus

This is an EPA registered disinfectant. Please refer to the actual container label for complete directions.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

CLEANING: Use one Hillyard Quick & Clean® Germicidal Disinfectant Wipe to completely remove surface of all gross debris from surfaces to be treated.

DISINFECTING: To disinfect hard, non-porous surfaces, thoroughly wet the surface to be treated. Treated surface must remain visibly wet 10 minutes for disinfection against Escherichia coli (E. coli), Enterococcus faecalis, Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella choleraesuis, Vancomycin Resistant Enterococcus (VRE), Mycobacterium bovis BCG (Tuberculosis), Staphylococcus aureus, Methicillin Resistant Staphylococcus aureus (MRSA), and Vancomycin Intermediate Resistant Staphylococcus aureus (VISA). A potable water rinse is required for surfaces in direct contact with food. For plastic and painted surfaces, spot test on an inconspicuous area before use. For heavily soiled surfaces, clean before following disinfecting instructions.

*VIRUCIDAL ACTIVITY: Hillyard Quick & Clean® Germicidal Disinfectant Wipes are an effective virucide on hard, non-porous surfaces against: Human Immunodeficiency Virus Type 1 (HIV-1) when the treated surface is allowed to remain wet for 2 minutes; and Norovirus (Norwalk Virus) and Feline calicivirus when the treated surface is allowed to remain wet for 10 minutes. Use additional wipes if needed to assure that the treated surface remains continuously wet for the prescribed time.

KILLS HIV-1 ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency virus Type-1 (HIV-1) (associated with AIDS).

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

Personal Protection: When handling items soiled with blood or body fluids use disposable latex gloves, gowns, masks and eye coverings. Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this product. Quick & Clean® Germicidal Disinfectant Wipes can be used for this purpose. Contact time: Thoroughly wet surface with a new wipe. Allow surface to air dry. Although efficacy at a 2 minute contact time has been shown to be adequate against HIV-1, use the contact time for the disinfection of other organisms listed on this label. Disposal of Infectious Materials: Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

Not for personal cleansing. This is not a baby wipe! Do not flush in toilet.

TO OPEN: Remove lid from canister. Lift flap in center of lid. Pull up corner of center wipe, twist to a point and thread through dispenser hole in lid. DO NOT PUSH FINGER THROUGH OPENING. Replace lid. Pull out exposed wipe and snap off. The next wipe pops up automatically. Dispose of used wipes in trash receptacle. Snap center flap down when finished to retain moisture. Do not flush.
